

Part results are shown after searching for a range of parts or when drilling down in to the tractor part search or other accessory areas.

You will see that some parts have banners down the left to indicate a feature that is important to that part. The key for these banners is shown below:

1. **NEW PART:** If you see this banner, it means that the corresponding part or kit has been recently introduced to the range. Parts are automatically shown in order of new to old, so expect to see new parts at the top of the list. Technical tables will also appear higher up the page if there are new parts within them.
2. **PARTS TABLE (TABLE):** This banner tells you that there is a technical table with a number of parts in that can be compared. It is represented in this way so users have the choice to view certain tables without having to scroll through long pages of irrelevant data. You can open and close as many of the tables on a page as required.
3. **LIMITED:** This banner lets you know that this product has limited availability in your area. This generally means we sell this product but it may not be available in your country. To view the countries that this part may be restricted to, click 'Available From' in the details box on the right.
