

- An important consideration for the new website was to improve the way products are displayed individually and in technical tables.
- You can now control the search results by modifying the number of parts per page and the way the parts are ordered on that page.
- You can add product to the basket at a much earlier stage in various quantities.
- Results are shown in a consistent structure, so it is easier to distinguish between the different parts available.
- Where products can be displayed and compared in a table, you will see an icon on the left.

The screenshot shows a search results page for a John Deere 6600 tractor. At the top, there's a search bar with the text "John Deere Type: Agricultural tractor Model: 6600 (6000 series)" and an "AMEND" button. Below the search bar is a navigation bar with various icons representing different tractor components. The main content area shows a list of parts. The first part is "VPM8052 - Cab filter" with a "DETAILS" button. The second part is "Hydraulic filter" with a "VIEW TABLE" button. A vertical red bar on the left side of the list is labeled "PARTS TABLE". Callouts explain that the "PARTS TABLE" icon indicates a technical table with a number of parts to compare, and that clicking the "VIEW TABLE" button expands the technical table.

- A 'VIEW TABLE' button will also be presented instead of the 'DETAILS' and 'ADD' button option.

- Once the table is open, you can view all technical information available about those products.
- In the example below, there are a small number of products in the table (less than 20). This means we can show the image and subtitle of the product without overpopulating the table with too much information.
- You can open as many tables as you like on the page to compare various products and engine numbers. You can also close tables which aren't relevant to you by clicking the 'CLOSE TABLE' button – this replaces the 'VIEW TABLE' button when the table is opened.

Filtration (8)
Ancillaries (7)

VPM8052 - Cab filter
 ONCE THE VIEW TABLE BUTTON HAS BEEN CLICKED, IT WILL CHANGE TO A CLOSE TABLE BUTTON, WHICH WHEN CLICKED WILL CLOSE THIS TABLE

 CLOSE TABLE

IN TECHNICAL TABLES WHERE THERE ARE A SMALLER NUMBER OF PRODUCTS, WE DISPLAY THE PRODUCTS HORIZONTALLY WITH AN IMAGE. THE VARIOUS PROPERTIES OF THE PRODUCT ARE SHOWN VERTICALLY ON THE LEFT SIDE OF THE TABLE.

USE THE ARROW BUTTONS ON THE FAR RIGHT OF THE TABLE TO VIEW MORE PRODUCTS IN THE TABLE.

Immobilisers
 Quick to install and easy to use

Technical information 1 of 1

	VPK1528	VPK1551	VPK1556
Hydraulic filter			
>>Length	150 mm	235 mm	235 mm
Outer Diameter	100 mm	97 mm	97 mm
Type	Spin on	Spin on	Spin on

- You can order the results depending on the technical properties (such as length or type) by clicking on the property you wish to order the results by.

- In the example below, there are a large number of products in the table (more than 20).
- Showing an Image for each part in this instance would not be viable so only the part number is shown vertically on the left and the technical properties along the top.
- This means less scrolling on larger tables and information that is easier to read and compare.
- Displaying the technical properties along the top with a scrollable page system also means there is the option of displaying unlimited amounts of information about the product, which was not previously possible.

IN TECHNICAL TABLES WHERE THERE ARE A LARGER NUMBER OF PRODUCTS, WE SHOW JUST THE PART NUMBER VERTICALLY ON THE LEFT AND THE TECHNICAL PROPERTIES HORIZONTALLY ALONG THE TOP.

THIS HELPS TO KEEP THE TABLE SMALLER AND EASIER TO VIEW WHEN THERE ARE MULTIPLE PRODUCTS DISPLAYED.

- Clicking on the part number or image in either table will take you to the final part page. The table will also appear on this final part page to make it easier to quickly compare other products whilst looking at more detailed information about the selected part.
